

**COATING COMPOSITION CONTAINING UV-CURABLE URETHANE  
(METH)ACRYLATES CONTAINING ISOCYANATE GROUPS AND  
URETHANE (METH)ACRYLATES CONTAINING HYDROXYL GROUPS**

Abstract of the Disclosure

The invention relates to coating compositions containing:

- a) urethane (meth)acrylates that contain (meth)acryloyl groups and free isocyanate groups,
  - b) urethane (meth)acrylates that contain (meth)acryloyl groups and free hydroxyl groups,
  - c) the UV initiators that initiate radical polymerization
- and
- d) optionally, one or more compounds that react with isocyanates.
